

Focused on designing and building scalable, secure mobile platforms with a strong emphasis on system design, reliability, and long-term maintainability

**Senior iOS Engineer with 10+ years of experience designing and scaling high-performance mobile platforms across consumer and enterprise domains.** Delivered impactful products including a PDF platform with 100K+ users and enterprise applications serving 5,000+ DAUs at IBM. Expert in Swift, SwiftUI, and offline-first architectures, driving measurable gains in delivery speed (40%) and build efficiency (30%). Proven ability to lead large-scale modernization initiatives, design modular systems, and ensure production reliability through secure, resilient engineering practices. Seeking Senior/Staff roles to build scalable mobile platforms and drive technical excellence in product-led organizations.

Leadership Impact Highlights

- Architected an offline-first sync platform (CoreData + REST) across 10+ enterprise workflows, significantly improving data consistency and eliminating recurring sync-related production issues.
- Led enterprise-wide UIKit → SwiftUI modernization, accelerating feature delivery cycles and reducing UI defects across multiple product modules.
- Designed and implemented a modular SPM-based architecture, enabling parallel development across teams and substantially reducing build times.
- Built and scaled Fill: PDF Editor from scratch, achieving 100K+ organic downloads and maintaining a 4.4★ App Store rating with strong production stability.
- Improved application performance and reliability by optimizing CoreData, caching, and memory management, resulting in faster load times and reduced crash occurrences.

Top Skills

Swift & SwiftUI Development

System Design & Scalability

CI/CD & DevOps (Azure DevOps, Quality Gates)

Mobile Platform Architecture

Performance Optimization

API Integration & Data Synchronization

Offline-First System Design

Swift Concurrency (Async/Await, GCD)

Testing & Code Quality (XCTest, Automation)

Modular Architecture (SPM)

Secure Mobile Development (Keychain, TLS)

Technical Leadership & Collaboration

Work Experience

Senior iOS Engineer / Technical Specialist

IBM India Pvt Ltd | Pune | Sept 2021 – Present

- Architect and own an **offline-first sync platform (CoreData + REST)** supporting 10+ enterprise workflows and **5,000+ DAUs**, improving data consistency by 35% and eliminating recurring sync-related production incidents.
- Lead large-scale **UIKit → SwiftUI modernization** across multiple product modules, accelerating feature delivery by 40% and significantly reducing UI defect rates.
- Design and implement a **modular SPM-based iOS architecture**, enabling **3+ squads** to develop and release independently, reducing monorepo build times by 30% and minimizing merge conflicts.
- Drive **security-first engineering practices** across regulated environments, implementing Keychain-based credential storage, TLS enforcement, and resiliency patterns to achieve consistently stable, crash-free releases.
- Strengthen **CI/CD pipelines and automated quality gates using Azure DevOps**, SwiftLint, and SonarQube, reducing post-merge defect leakage and improving overall code quality standards.
- Act as **technical lead for the iOS platform**, partnering with backend, QA, product, and security teams to design scalable APIs and deliver reliable, on-time releases.
- Establish and scale **reusable SwiftUI component libraries and shared modules**, improving development consistency and reducing feature development effort across teams.
- Apply **data-driven engineering practices using Firebase Analytics and A/B testing**, identifying user journey bottlenecks and improving feature performance and adoption.
- Leverage **GenAI tools (GitHub Copilot, Windsurf)** to refactor complex legacy modules, enhance code maintainability, and accelerate delivery without introducing regressions.

Senior iOS Developer

Moon Technolabs Pvt Ltd | Gujarat | Mar 2018 - Sep 2021

- Built and launched **Fill: PDF Editor & E-Sign** from scratch, achieving **100K+ organic downloads** and maintaining a **4.4★ App Store rating** with strong production stability.
- Developed a full-featured **PDF platform** supporting annotation, form-filling, digital signatures, audit trails, encrypted storage, and subscription-based monetization (IAP).
- Designed and implemented **reusable component libraries and service layers**, improving development efficiency and accelerating feature delivery across projects.
- Optimized **CoreData, caching, and REST networking layers**, improving application performance and delivering faster load times under varying network conditions.
- Diagnosed and resolved **memory leaks, threading issues, and performance bottlenecks using Instruments**, improving application stability and reducing production crashes.

iOS Developer

ShahInfoTech | Maninagar · Hybrid | Jun 2016 - Mar 2018

- Migrated legacy **Objective-C codebases to Swift**, improving code maintainability and enabling faster feature development.
- Resolved **threading and UI rendering issues**, enhancing application responsiveness and delivering a smoother user experience.
- Reduced production crashes by implementing **structured debugging practices and QA processes**, improving overall application stability.

Tools & Technical Skills

**Languages & Frameworks:** Swift, Objective-C, SwiftUI, UIKit, Combine, Core Data

**Architecture & Design:** MVVM, Clean Architecture, Modular Architecture (SPM), System Design

**Concurrency & Performance:** GCD, Async/Await, Multithreading, Memory Management, Performance Optimization

**Data & APIs:** Offline-First Architecture, Data Synchronization, REST APIs, Caching Strategies

**Security & Quality:** Keychain, TLS/HTTPS, XCTest, Unit/UI Testing, Debugging

**DevOps & Tools:** Git, Azure DevOps, CI/CD, SwiftLint, SonarQube, Firebase, Crashlytics, Xcode, Instruments, Copilot

Education Details

**Bachelor of Engineering (B.E.) – Information Technology**  
Ahmedabad Institute of Technology, Gujarat | CGPA: 8.7

**Diploma in Information Technology**  
Government Polytechnic, Ahmedabad | CGPA: 7.5

Certification Details

**Azure Data Fundamentals (2025)**

**Agile Explorer – IBM (2024)**

**Azure Fundamentals (2025)**

**IBM iOS Design Essentials (2023)**
